VOLUME 32 (1987)

CONTENTS

JANUARY

Review Article
D. LANDOLT — 1 — Fundamental aspects of electropolishing

Review Article
M. D. ARCHER, C. C. CORKE and B. H. HARJI — 13 — The electrochemical properties of metallic glasses

R. I. TUCCERI and D. POSADAS — 27 — Capacitance and surface conductance study of the adsorption of pentan-1-ol on gold

G. J. GORDILLO and D. POSADAS — 33 — Ionic components of charge at the mercury–KCl + KI aqueous solution interphase

M. HEPEL and S. BRUCKENSTEIN — 41 — Dissociative adsorption of thiourea at a polycrystalline silver electrode in alkaline media

K. SCOTT — 47 — A comment on the mechanism of anodic chlorate formation

R. MCINTYRE, D. SCHERSON, W. STORCK and H. GERISCHER — 51 — Oxygen reduction at the basal plane of stress-annealed pyrolytic graphite in acetonitrile solutions

G. MENGOLI, M. M. MUSIANI, M. FLEISCHMANN and N. GARRARD — 55 — Electrochemical synthesis and study of a poly(4-vinylpyridinium hydrobromide perbromide) electrode

D. R. CROW — 63 — Diffusion behaviour of the lead–acetate system

E. CASASSAS, M. ESTEBAN and C. ARIÑO — 67 — Anodic oxidation of mercury in the presence of thioether acids: ethane-1,2-bis-mercaptoacetic acid

M. A. ZON, H. FERNÁNDEZ, L. SERENO and J. J. SILBER — 71 — Electrochemical study of the stability of the electron-donor–acceptor (EDA) complex between *N,N,N′,N′*-tetramethyl-*p*-phenylendiamine and *m*-dinitrobenzene in acetonitrile

M. KAROLCZAK — 79 — Electrosorption from multicomponent liquid systems—II. General equations for surface pressure, electrosorption isotherm and surface charge density

W. WILHELMSEN and T. HURLEN — 85 — Passive behaviour of titanium in alkaline solution

A.-M. REDON — 91 — Theoretical analysis of the influence of the adsorption process on the voltametric curves in the case of a second order adsorption step followed by a photocurrent

W. WILHELMSEN and T. HURLEN — 95 — Polarization and *dc* capacitance of passive aluminium electrodes

M. J. LAIN and D. PLETCHER — 99 — *In situ* electrodeposition of catalysts for the electrocatalytic hydrogenation of organic molecules—I. The deposition of nickel

M. J. LAIN and D. PLETCHER — 109 — *In situ* electrodeposition of catalysts for the electrocatalytic hydrogenation of organic molecules—II. Hydrogenation of carbonyl compounds on nickel

P. BJÖRNBOM — 115 — Modelling of a double-layered PTFE-bonded oxygen electrode

A. Q. CONTRACTOR and J. O'M. BOCKRIS — 121 — Photoelectrocatalysis of oxygen evolution on n-TiO_2

R. R. ADŽIĆ and LJ. V. MINEVSKI — 125 — The electrosorption valency of the lead adatoms on a platinum electrode

D. B. SEPA, M. V. VOJNOVIC, LJ. M. VRACAR and A. DAMJANOVIC — 129 — Different views regarding the kinetics and mechanisms of oxygen reduction at Pt and Pd electrodes

R. D. ARMSTRONG and H. ASHASSI-SORKHABI — 135 — Mobility of Na^+ in PVC membranes containing valinomycin and di-benzo-18-crown-6

E. Fatás, P. Herrasti, F. Arjona, E. Garcia Camarero and J. A. Medina — 139 — Electrodeposition and characterization of CdS thin films on stainless steel and tin oxide substrates

J. V. Dobson and G. Brims — 149 — The measurement by the $(\alpha + \beta)$ palladium hydride electrode of the approximate pH of phosphate and acetate buffer solution at elevated temperatures and pressures

R. D. Armstrong and M. Todd — 155 — Ionic mobilities in PVC membranes

M. Milkowska — 159 — Adsorption of thiourea at the polycrystalline silver electrode from aqueous KF solutions—I

J. Vondrák — 163 — Electrochemical absorption of hydrogen in transition metal oxides—II. Sorption of hydrogen in titanium monoxide TiO

I. Montero, M. Fernández and J. M. Albella — 171 — Pore formation during the breakdown process in anodic Ta_2O_5 films

B. Galland, J.-C. Moutet et G. Reverdy — 175 — Electrochimie organique photoassistée: une réaction photoinduite du radical cation de la tétraphénylporphyrine de zinc

J. Berthelot — 179 — Hydrodimérisation électroassistée par des sels métalliques, en milieu aprotique, de la phényl-1 diméthyl-4,4 pentène-1, one-3

Short Communications

E. Hämeenoja, T. Laitinen and G. Sundholm — 187 — The formation of soluble Pb(IV) and Pb(II) species in the reactions of the $PbSO_4/PbO_2$ electrode

S. H. White and U. M. Twardoch — 191 — The electrochemistry of water at noble metals in an ionic solvent

Book Review

A. K. Covington — 195 — Computational Methods for the Determination of Formation Constants. Edited by D. J. Leggatt

Erratum — 197

Announcements — 199 — ISE Meeting 1987

200 — Application for Individual Membership

201 — Electrochemical Calendar

FEBRUARY

Review Article

P. Nikitas — 205 — Comparison of different molecular models of adsorption at electrodes

Review Article

E. Gileadi — 221 — The combined adsorption isotherm

M. G. Figueroa, M. F. L. de Mele, R. C. Salvarezza and A. J. Arvia — 231 — Electrochemical behaviour of copper in potassium thiocyanate solution—II. Analysis of potentiostatic current transients

S. Szpak, C. J. Gabriel and J. R. Driscoll — 239 — Catastrophic thermal runaway in lithium batteries

M. H. Miles — 247 — Cathodic reactions involving lead, cadmium and silver ions in $NaNO_3$–KNO_3 melts at 250°C

J. M. Albella, I. Montero and J. M. Martínez-Duart — 255 — A theory of avalanche breakdown during anodic oxidation

V. I. Birss and C. K. Smith — 259 — The anodic behavior of silver in chloride solutions—I. The formation and reduction of thin silver chloride films

J. I. Japaridze, V. A. Chagelishvili and S. Trasatti — 269 — Influence of ionic association on Cs^+ adsorption at the mercury electrode from glycols

R. W. Yeo and T. Z. Fahidy — 277 — A numerical analysis of axial dispersion in electrolyzers

C. MÜLLER, J. CLARET and M. SARRET 283 Phase transitions in mercury–quinoline derivative systems. Electrochemical adsorption and nucleation processes in 8-hydroxyquinoline solutions

M. A. QUIROZ, I. GONZALEZ, Y. MEAS, E. LAMY-PITARA and J. BARBIER 289 Electrochemical preparation of a Pt–Ru alloy

H. TOUHARA, H. FUJIMOTO, K. KADONO, N. WATANABE and M. ENDO 293 Electrochemical characteristics of fluorine intercalated graphite fiber–lithium cells

M. MORITA, F. TACHIHARA and Y. MATSUDA 299 Dimethyl sulfoxide-based electrolytes for rechargeable lithium batteries

Y. NAKABAYASHI and Y. MASUDA 307 Thermodynamic study and solvent effect of 8-quinolinethiolato complexes of manganese(II) and nickel(II) ions

J.-J. JOW and T.-C. CHOU 311 Product distributions and kinetics of cathodic reduction of vanillin in aqueous solution

R. D. MARIANI and H. D. ABRUÑA 319 Transport properties of liquid crystal doped films of polyvinylferrocene

R. ANDREOLI, A. BARBIERI, L. BENEDETTI, G. BORGHESANI and G. GAVIOLI 325 Adsorption of *N*-tosylglycine at the Hg/aqueous solution interface at various pH values

M. R. GENNERO DE CHIALVO and A. C. CHIALVO 331 Ionic hydration model for uni-univalent electrolytes. Calculation of the mean hydration number from experimental solute activity coefficient and water activity data

K. ASAMI, M. OKI, G. E. THOMPSON, G. C. WOOD and V. ASHWORTH 337 Composition of the near surface regions of conversion coated aluminium

C. BOULANGER et J.-M. LECUIRE 345 Insertion électrochimique de nickel et de manganèse dans les chalcogénures Mo_6S_8 et Mo_6Se_8

Short Communications

S. STERNBERG, A. MATEESCU, V. BRÂNZOI and L. APĂTEANU 349 Effect of H_3PO_4 on the $PbSO_4/PbO_2$ electrode in H_2SO_4 solutions

M. NOVÁK and Cs. VISY 353 Effect of the oxide layer on chloro-ketone formation in the electrochemical chlorination of cyclohexene on Pt electrode

P. N. ROSS, E. J. CAIRNS, K. STRIEBEL, F. MCLARNON and P. C. ANDRICACOS 355 The reaction order for oxygen reduction in TFMSA on Pt

S. A. CAMPBELL and L. M. PETER 357 Determination of the density of lead dioxide films by *in situ* laser interferometry

Book Reviews

A. K. COVINGTON 361 Ion-selective Electrodes, 4. Edited by E. PUNGOR and I. BUZAS

APRIL

D. LANDOLT	539	Editorial
J. GENESCÀ and R. DURÁN	541	The effect of Cl^- on the kinetics of the anodic dissolution of Pd in H_2SO_4 solutions
O. R. BROWN and J. S. WHITLEY	545	Electrochemical behaviour of aluminium in aqueous caustic solutions
R. R. PRADHANANGA and K. JÜTTNER	557	Hole capture cross section on CdS photoelectrodes
M. A. SLIFKIN and S. M. ALI	563	Relaxation of riboflavin and its semiquinone produced by electrochemical reduction
H. ÖZYÖRÜK, K. PEKMEZ and A. YILDIZ	569	Electrochemical reduction of tetraphenylcyclopentadienones
P. H. L. NOTTEN	575	The role of surface charging and potential redistribution on the kinetics of hole injection reactions at *n*-GaAs
E. CORRETGE and J. M. NIGRETTO	583	Electroanalytical assay of human prekallikrein activation from whole blood dilutions
J. B. GILL, M. HALL and D. MACINTOSH	589	Electrolyte solutions in liquid ammonia—IX. Electrodeposition and electrodissolution of metals from their salts
K. R. BARQAWI and M. A. ATFAH	597	A cyclic voltammetric study of some quinoxaline di-*N*-oxides and quinoxalines in acetonitrile: substituent effect on the cathodic reduction
G. PIERRE, A. ZIADE and M. EL KORDI	601	The oxidation of glyoxal and ethylene glycol on platinum in aqueous acid mediums containing some metal salts
Q. ZHUXIAN and Z. MINGJIE	607	Studies on anode effect in molten salts electrolysis
F. HUNKELER, A. KROLIKOWSKI and H. BÖHNI	615	A study of the solid salt film on nickel and stainless steel
L. DURAI, R. DHANASEKARAN and P. RAMASAMY	621	Computer simulation of voltammogram and surface coverage and the factors influencing them
A. M. HAFEZ, M. SH. RAMADAN and H. SADEK	625	Ion-pair formation and Walden product of some *s*-alkylisothiouronium salts in non-aqueous solvents at 25°C
K. H. WONG and R. A. OSTERYOUNG	629	Real-time simplex optimization of square wave voltammetry
H. VOGT	633	Superposition of microconvective and macroconvective mass transfer at gas-evolving electrodes—a theoretical attempt
G. A. TSIRLINA and O. A. PETRII	637	Role of carbon deficiency and anodic activation in the electrochemistry of carbide materials
G. A. TSIRLINA and O. A. PETRII	649	Hydrogen evolution on smooth stoichiometric tungsten and chromium carbides
P. EKDUNGE, K. V. RYBALKA and D. SIMONSSON	659	Recharge kinetics and structural changes in the porous lead electrode in H_2SO_4 solution
Z. GALUS, J. GOLAS and J. OSTERYOUNG	669	Linear scan voltammetry and chronoamperometry at small mercury film electrodes
G. F. THOMAS and K. SORA	673	The concentration–time profile in a recirculating electrochemical reactor
E. VALLES, E. GOMEZ, C. MÜLLER and J. CLARET	677	Oxidation of pyruvate on gold electrode in basic media
M. JURKIEWICZ-HERBICH	683	Electrical double layer studies of thiourea in acetone–KPF_6 solutions
M. W. BREITER, N. S. CHOUDHURY and E. L. HALL	689	Studies of the interface between indium and beta/beta″ alumina tubes
C. BARBERO, J. ZERBINO, L. SERENO and D. POSADAS	693	Optical properties of electropolymerized orthoaminophenol

Y. Chryssoulakis, F. Lantelme, A. Alexopoulou, S. Kalogeropoulou et M. Chemla — 699 Etude des coefficients d'interdiffusion dans les solutions solides Al–Ag par les méthodes électrochimiques transitoires dans l'eutectique ternaire NaCl–KCl–LiCl

F. Lapicque et A. Storck — 709 Etude polarographique de la réduction de l'acide 4-nitrobenzoïque en milieu acide concentré

A. Bennouna, B. Durand et O. Vittori — 713 Influence de la nature de l'électrolyte sur la reactivite électrochimique du chromate de baryum incorpore dans une électrode à pâte de carbone

Short Communications

A. Hamelin and S. Röttgermann — 723 Cyclic voltammograms of the Au(100) face

M. V. Sangara Narayanan — 725 Double layer as a "composite medium"—a note

Book Review

F. Goodridge — 727 Electrochemical Engineering Volumes I and II. By I. Roušar, K. Micka and A. Kimla

Announcement — 729 Electrochemical Calendar

MAY

M. M. Lohrengel, J. W. Schultze, H. D. Speckmann and H.-H. Strehblow — 733 Growth, corrosion and capacity of copper oxide films investigated by pulse techniques

S. Jarek and J. Thonstad — 743 Fast voltammetry study of anodic reactions on graphite in cryolite–alumina melts

S. I. Córdoba, R. E. Carbonio, M. L. Teijelo and V. A. Macagno — 749 The effect of iron hydroxide on nickelous hydroxide electrodes with emphasis on the oxygen evolution reaction

G. Inzelt, G. Horányi and J. Q. Chambers — 757 Radiotracer study of the sorption of counter- and co-ions in tetracyanoquinodimethane and poly(vinyl ferrocene) modified electrodes

L. M. Siperko and T. Kuwana — 765 Electrochemical and spectroscopic studies of metal hexacyanometalate films—III. Equilibrium and kinetic studies of cupric hexacyanoferrate

J. Doménech, M. Andrés and J. Muñoz — 773 Photoinduced oxygen uptake in aqueous suspensions of ZnO

L. P. Bicelli — 777 Thermodynamic stability of n-In_2S_3 photoelectrodes

A. J. Bloom, M. Fleischmann and J. M. Mellor — 785 Nitration procedures using electrogenerated reagents

H. Nakajima, Y. Takakuwa, H. Kikuchi, K. Fujikawa and H. Kita — 791 Metal electrodes bonded on solid polymer electrolyte membranes (SPE)—IV. Morphological features and electrical resistance of Pt– and Au–SPE electrodes

J. O'M. Bockris, B. R. Scharifker and J. L. Carbajal — 799 Concentration and potential dependence of the adsorption of thiourea and thiocyanate on iron surfaces

T. Hurlen and S. Hornkjøl — 811 Passive behaviour of zirconium

C. J. van Velzen, M. Sluyters-Rehbach and J. H. Sluyters — 815 The electrochemical reduction of Sn(II) at the dropping mercury electrode from aqueous 1 M sulfuric acid and from 0.3 M phenolsulphonic acid and its inhibition by ENSA-6

J. W. Schultze and K. Wippermann — 823 Inhibition of electrode processes on copper by AHT in acid solutions

Book Reviews

R. N. Parkins — 833 Cathodic Protection: Theory and Practice. Edited by V. Ashworth and C. J. L. Booker

M. W. Breiter — 834 The Sodium Sulfur Battery. By J. L. Sudworth and A. R. Tilley

Announcements — 835 List of Speakers for the Maastricht Meeting—September 1987

837 Electrochemical Calendar

JUNE

CORROSION AND ELECTROCHEMICAL BEHAVIOUR OF METALS IN NON-AQUEOUS SOLVENTS

GUEST EDITOR: F. BELLUCCI

F. Bellucci, P.-L. Bonora, G. Capobianco and J. Crousier — 841 Foreword

Plenary Lecture
S. Trasatti — 843 Interfacial behaviour of non-aqueous solvents

Plenary Lecture
N. D. Greene, M. S. Mekhjian and M. B. Gorensek — 851 Experimental difficulties during electrochemical studies in very concentrated acids

Plenary Lecture
T. Mussini and F. Mazza — 855 Medium effects as key electrochemical variables for corrosion and electrochemistry studies in non-aqueous and mixed solvents

Plenary Lecture
A. M. Bond and T. F. Mann — 863 Voltammetric measurements without ohmic and other forms of distortion in aromatic hydrocarbon solvents

Plenary Lecture
J. Banaś — 871 Passivity of iron and nickel in a CH_3OH–H_2O–H_2SO_4 system

R. T. Atanasoski, H. H. Law, R. C. McIntosh and C. W. Tobias — 877 Electrochemical analysis of trace amounts of water in propylene carbonate electrolytes

M. Tzinmann, A. Kriaa and C. Fiaud — 887 The Hammett acidity functions and their use for metallic corrosion in hydro-organic solutions

S. Białłozór and E. T. Bandura — 891 On electrochemical behaviour of zinc in organic solvents

R. N. Singh, L. Bahadur and P. Singh — 895 Electrochemical behaviour of brass (Cu/Zn, 63/37) in binary mixtures of acetonitrile and water

U. Lechner-Knoblauch and E. Heitz — 901 Corrosion of zinc, copper and iron in contaminated non-aqueous alcohols

M. G. Athayde, O. R. Mattos and L. Sathler — 909 The anodic behaviour of iron in ethanol–water solutions in the presence and absence of $NaClO_4$ as the supporting electrolyte

I. Sekine, S. Hatakeyama and Y. Nakazawa — 915 Effect of water content on the corrosion behaviour of Type 430 stainless steel in formic and acetic acids

P. Kirkov — 921 The influence of drag reducers and inhibitors on the rate and mechanism of corrosion in petroleum white products in the presence of moisture

B. Elsener, S. Virtanen and H. Boehni — 927 Corrosion and passivation of amorphous and crystalline Fe–Cr alloys in ethanol/water/HCl mixtures

E. Cavalcanti, V. G. Wanderley, T. R. V. Miranda and L. Uller — 935 The effect of water, sulphate and pH on the corrosion behaviour of carbon steel in ethanolic solutions

F. Bellucci, P.-L. Bonora, G. Capobianco, J. Crousier and J.-P. Crousier — 939 A contribution to the study of the electrochemical behaviour of nickel in a methanol–water–sulphuric acid system

S. E. Faidi, G. Jones and J. D. Scantlebury — 947 The corrosion of mild steel in ethylene glycol monoethyl ether–water mixtures

EA 32:12-J

M. Fichera, R. Leonardi and C. A. Farina — 955 Fuel ash corrosion and its prevention with MgO addition

S. Morzilli, F. Bonino and B. Scrosati — 961 Characteristics of the lithium electrode in organic and polymeric electrolytes

G. Silvestri, S. Gambino and G. Filardo — 965 Anodic behaviour of aluminium in halogenated media. Electrogenerated alkylation catalysts

Y. Roques, G. Mankowski, G. Chatainier and F. Dabosi — 971 Stress corrosion cracking and pitting corrosion relation for Zircaloy-4 in chloride-containing hydro-alcoholic media

C. A. Farina and U. Grassini — 977 Stress corrosion cracking in non-aqueous media

981 Abstracts

Announcements

987 The Scientific Divisions of ISE

JULY

G. Couturier, D. W. Kirk, P. J. Hyde and S. Srinivasan — 995 Electrocatalysis of the hydrogen oxidation and of the oxygen reduction reactions on Pt and some alloys in alkaline medium

S. Panero, P. Prosperi, F. Bonino, B. Scrosati, A. Corradini and M. Mastragostino — 1007 Characteristics of electrochemically synthesized polymer electrodes in lithium cells—III. Polypyrrole

M. E. Martins, J. J. Podestá and A. J. Arvia — 1013 Chemical evidence of hydrogen sorption processes on potential cycled gold electrodes

M. V. Smirnov, V. A. Khokhlov and E. S. Filatov — 1019 Thermal conductivity of molten alkali halides and their mixtures

S. I. Bailey and I. M. Ritchie — 1027 The effect of borate buffer on *ortho* quinone electrochemistry

J. Xiong, P. M. May and I. M. Ritchie — 1035 The diffusion coefficient of cobalt(II) and bisulphate in moderately acidic sulphate solutions

A. Milchev, T. Chierchie, K. Jüttner and W. J. Lorenz — 1039 Substrate transformation phenomena during electrochemical nucleation of silver on polyfaced platinum single crystal electrodes—I. Temperature and overpotential dependence of the stationary nucleation rate

A. Milchev, T. Chierchie, K. Jüttner and W. J. Lorenz — 1043 Substrate transformation phenomena during the nucleation of silver on polyfaced platinum single crystal electrodes—II. Characterization of the platinum surface

R. C. Salvarezza, N. de Cristofaro, C. Pallotta and A. J. Arvia — 1049 Stochastic and deterministic behaviours of 316 stainless steel pitting corrosion in phosphate–borate buffer containing sodium chloride

C. Horányi and E. M. Rizmayer — 1057 Radiotracer study of the adsorption of pimelic acid at a platinized platinum electrode

J. Ludvík, J. Volke and J. Klíma — 1063 Electrochemical oxidation mechanisms of different type 1,4-dihydropyridine derivatives in acetonitrile

S. Jaya, T. Prasada Rao and G. Prabhakara Rao — 1073 Mono- and multilayer formation studies of cobalt on glassy carbon electrode

F. P. Dousek — 1079 Behaviour of a potassium electrode pre-treated with water vapour or gaseous oxygen

V. Papež, P. Novák, J. Pfleger, I. Kmínek and S. Nešpůrek — 1087 The electrical and electrochemical characteristics of polyacetylene

P. Ocon, B. Beden and C. Lamy — 1095 Electrocatalytic oxidation of 1,2-propanediol—II. Behaviour of platinum ad-atom electrodes in alkaline medium

M. T. Razafiarimanana, M. Daguenet, G. Le Palec et F. Coeuret — 1103 Transfert de matière en convection mixte entre une sphère en rotation et un liquide Newtonien en écoulement vertical ascendant

Short Communications

M. Abda, Y. Oren and A. Soffer — 1113 The electrodeposition of trace metallic impurities: dependence on the supporting electrolyte concentration—a comparison between bipolar and monopolar porous electrodes

A. Curulli, A. Inesi and E. Zeuli — 1117 Electrochemical alkylation of cyclic and linear ketones

H. Tanabe and K. Ohno — 1121 Electrocatalysis of metal phthalocyanine thin film prepared by the plasma-assisted deposition on a glassy carbon in the reduction of carbon dioxide

V. Surganov, P. Morgen, J. G. Nielsen, G. Gorokh and A. Mozalev — 1125 Study of the initial stage of aluminium anodization in malonic acid solution

Announcement

1129 The Scientific Divisions at ISE

1131 Electrochemical Calendar

AUGUST

G. R. Stafford — 1137 The electrogenerative partial oxidation of propylene

J. Casado and I. Gallardo — 1145 Side reactions in macroscale electrolysis of halobenzenes in DMF at a mercury cathode

B. Fotouhi and A. Katty — 1149 Electrochemical cathodic reactions on *n*-type SnS_2

S. B. Saidman, J. R. Vilche and A. J. Arvia — 1153 Voltammetry of cadmium in sodium hydroxide solutions containing sodium sulphide

J.-M. Kauffmann, J.-C. Vire, G. J. Patriarche, L. J. Nunez-Vergara and J. A. Squella — 1159 Voltammetric oxidation of trazodone

O. R. Brown, B. M. Ikeda and M. J. Wilmott — 1163 Anodic films on fluorine anodes: the nature of fluorine overvoltage

E. Rach and J. Heitbaum — 1173 Electrochemically induced surface modifications of Pt–Au alloy

I. Rodriguez, M. L. Marcos and J. González-Velasco — 1181 Mechanism of electrochemical growth of polypyrrole on a glass electrode doped with SnO_2 (ITO) from aqueous solutions

F. T. A. Vork, L. J. J. Janssen and E. Barendrecht — 1187 Ohmic resistance of polypyrrole-modified electrodes with incorporated Pt particles

K. Ogura and I. Yoshida — 1191 Electrocatalytic reduction of carbon dioxide to methanol—VI. Use of a solar cell and comparison with that of carbon monoxide

E. Tsuchida, H. Ohno and N. Kobayashi — 1197 Conductivity and thermal properties of *N*-alkylated-heterocyclic compound–TCNQ complex salts and application to organic capacitor

C. Moina and D. Posadas — 1203 Salt formation during the anodic dissolution of iron in $(NH_4)_2SO_4$ at pH = 2—I. Steady state behavior

R. N. O'Brien and K. S. V. Santhanam — 1209 Electrocatalysis of oxygen reduction at a polycarbazole electrode

A. G. Pavese, V. M. Solís and M. C. Giordano — 1213 Oxidation of formic acid on palladium anodes in acidic medium. Effect of Pd(II) ions

A. R. Newmark and U. Stimming — 1217 Photoinduced electron transfer involving localized electronic states

E. M. Genies and M. Lapkowski — 1223 Electrochemical oxidation of naphthylamine in NH_4F, 2.3 HF medium

K.-Y. Chan, G. S. Efthymiou and J. F. Cocchetto — 1227 A wedge-meniscus model of gas-diffusion electrodes

J. B. Goodenough, A. Hamnett, B. J. Kennedy and S. A. Weeks — 1233 XPS investigation of platinized carbon electrodes for the direct methanol air fuel cell

G. Mengoli, M. M. Musiani, M. Fleischmann, B. Mao and Z. Q. Tian — 1239 Enhanced Raman scattering from iron electrodes

Y. Chryssoulakis, F. Lantelme, A. Alexopoulou and S. Kalogeropoulou — 1247 Interdiffusion dans les alliages Al–Ag par les méthodes electrochimiques dans l'eutectique NaCl–KCl–LiCl–LiF

Short Communications

A. Sobkowiak — 1251 The influence of pH on the catalytic current of the Fe(III)/H_2O_2 system

M. Tschapek, C. Wasowski and S. Falasca — 1253 The effect of surface charges (the wall effect) in sand

M. Szklarczyk — 1257 Interaction of HCOOH with *n*-Si metalized electrode

Book Reviews

J. Koryta — 1261 Modern Bioelectrochemistry. Edited by F. Gutmann and H. Keyzer

J. Koryta — 1261 Electrochemistry in Research and Development. Edited by R. Kalvoda and R. Parsons

A. Hodinář and J. Koryta — 1262 Introduction to Electrochemistry. Edited by S. Tajima and D. K. Tsuron

SEPTEMBER

Review Article

A. M. Kuznetsov — 1271 Modern aspects of quantum theory of charge-transfer processes

P. Nikitas — 1279 On the derivation of the state equation in models of adsorption from solution

J. M. Skowroński — 1285 The effects of the preparation conditions on the electrochemical properties of graphite-CrO_3 intercalation compounds in acid electrolyte—I. The studies on lower chromium oxides

R. M. Torresi, O. R. Cámara, C. P. De Pauli and M. C. Giordano — 1291 Hydrogen evolution reaction on anodic titanium oxide films

J. M. Marracino, F. Coeuret and S. Langlois — 1303 A first investigation of flow-through porous electrodes made of metallic felts or foams

H. Özyörük and A. Yildiz — 1311 Electro-oxidation behaviour of some methoxyanthracenes in benzonitrile

T. Z. Fahidy — 1315 An analysis of non-isothermal plug-flow electrolyzers

P. Ll. Cabot, M. Cortés, F. A. Centellas, J. A. Garrido and E. Pérez — 1321 Cathodic reduction of the anodically formed zinc species as a contribution to the study of the potentiodynamic passivation of zinc in alkaline media

D. Schuhmann — 1331 The influence of an electric field on adsorption of organic substances at electrodes—I. Generalization of the Frumkin's theory from the modified model of two parallel condensers

A. Bennouna, B. Durand and O. Vittori — 1337 Electrochemical reactivity of lead chromate in carboxylic acids

Y. Massiani, J. Crousier, G. Picq and P. Vennereau — 1343 Role of the structure and of the chromium content in the electrochemical and photo electrochemical behaviours of the (44-*x*)Fe-6B-36Ni-14P-*x*Cr alloys

L. M. Peter and G. A. Wright — 1353 Electrochemical kinetics of bismuth sulphide formation on bismuth amalgam

R. M. Torresi, O. R. Cámara and C. P. De Pauli — 1357 Influence of the hydrogen evolution reaction on the anodic titanium oxide film properties

L. TAMISIER and A. CAPRANI — 1365 Electrochemical study of the $Fe(CN)_6^{4-}/Fe(CN)_6^{3-}$ couple at the ITO/NaCl interface

M. MALY-SCHREIBER, P. LINHARDT and M. W. BREITER — 1371 Studies of the properties of polycrystalline (Na, Pb) β-aluminas

M. KAMATA, Y. ITO and J. OISHI — 1377 Single electrode Peltier heat of a hydrogen electrode in H_2SO_4 and NaOH solutions

J. DOMÉNECH and J. MUÑOZ — 1383 Photocatalytical reduction of Cr(VI) over ZnO powder

K. MICKA and I. ROUŠAR — 1387 *In situ* measurement of conductivity and active surface area of porous electrodes by the current step method—I. Theory

K. CHANDRASEKARAN and J. O'M. BOCKRIS — 1393 Determination of concentration of surface states at the illuminated semiconductor–electrolyte interface

Short Communications

R. D. ARMSTRONG and M. TODD — 1403 Time dependent effects in PVC membranes

M. KANEKO, T. OKADA, S. TERATANI and K. TAYA — 1405 Visible light cleavage of water by CdS photoanode coated with polymer-pendant $Ru(bpy)_3^{2+}$ film containing RuO_2 dispersions

Book Reviews

S. TRASATTI — 1409 Comprehensive Chemical Kinetics Vol. 26. Electrode Kinetics: Principles and Methodology. Edited by C. H. BAMFORD and R. G. COMPTON

D. G. HALL — 1410 The Chemical Physics of Solvation Part A: Theory of Solvation. Edited by R. R. DOGONADZE, E. KALMAN, A. A. KORNYSHEV and J. ULSTRUP

Announcements — 1413 The Scientific Divisions of ISE

1415 Electrochemical Calendar

OCTOBER

R. C. SALVAREZZA, D. V. VÁSQUEZ MOLL and A. J. ARVIA — 1421 Mechanistic approach to electrochemical processes in the passive and pitting corrosion regions of carbon steel in dilute NaOH solutions containing Na_2SO_4

J. CLARET, C. MÜLLER, J. M. FELIU and J. ALCALDE — 1431 Electrodimerization of quinoline derivatives. 5-chloro- and 5,7-dichloro-8-hydroxyquinoline

C. CLERC and D. LANDOLT — 1435 On the theory of anodic levelling: behaviour of macroprofiles

P. K. LAI and M. SKYLLAS-KAZACOS — 1443 Aluminium deposition and dissolution in aluminium chloride–*n*-butylpyridinium chloride melts

A. HAMMOUCHE and A. HAMMOU — 1451 Lithium insertion into V_4O_9

M. L. MARCOS, I. RODRIGUEZ and J. GONZÁLEZ-VELASCO — 1453 Mechanism of formation of polypyrrole on a Pt electrode from aqueous solutions

S. PANERO, P. PROSPERI and B. SCROSATI — 1461 Properties of electrochemically synthesized polymers—V. The polymer electrode/polymer electrolyte interface

S. PANERO, P. PROSPERI and B. SCROSATI — 1465 Characteristics of electrochemically synthesized polymer electrodes in lithium cells—IV. Effects of the synthesis conditions on the performance of polypyrrole

W. WILHELMSEN and A. P. GRANDE — 1469 The influence of hydrofluoric acid and fluoride ion on the corrosion and passive behaviour of titanium

M. ABRAHAM and M.-C. ABRAHAM — 1475 Temperature dependence of the electrical conductance and viscosity of nitrate–water mixtures, from fused salts to water

J. A. LEISTRA and P. J. SIDES — 1489 Hyperpolarization of gas evolving electrodes—I. Aqueous electrolysis

A. M. HERAS, E. MUÑOZ, J. L. AVILA and L. CAMACHO — 1495 Determination of the rate constants for a CECE reduction mechanism

S. RONDININI and A. NESE — 1499 Standard pH values for potassium hydrogenphthalate reference buffer solutions in acetonitrile–water mixtures up to 70 wt% at various temperatures

F. BARBA, M. D. VELASCO, N. MORENO and A. ALDAZ — 1507 Electrochemical behaviour of α,α-dibromodibenzoylmethane: an alternative route to the cathodic reduction of organomercury compounds

F. LI and S. DONG — 1511 The electrocatalytic oxidation of ascorbic acid on Prussian blue film modified electrodes

H. MINOURA, M. INAGAKI, A. WATANABE, T. SUGIURA and Y. UENO — 1515 Microscopic observation of Tl_2O_3 electrodeposition at *N*-type WSe_2 electrode

N. KUMAGAI, N. KUMAGAI and K. TANNO — 1521 Electrochemical and structural characteristics of molybdic acid as a new cathode material for nonaqueous lithium batteries

R. HOLZE — 1527 Potential- and pH-dependent adsorption of aniline on silver as evidenced with Surface Enhanced Raman Spectroscopy

Short Communications

J. BRUNEAUX, H. CACHET, M. FROMENT, J. AMBLARD, J. BELLONI and M. MOSTAFAVI — 1533 Improvement of charge transfer kinetics at transparent SnO_2 counter-electrodes by means of a radiolytic grafting of metallic nanoaggregates

K. EMA, Y. ITO, T. TAKENAKA and J. OISHI — 1537 Relation between potentials of Li, K/Li^+, K^+ dynamic reference electrode and HF/H_2 gas electrode in a molten LiF–KF system

Announcements

1541 The Scientific Divisions of ISE

1542 I.S.E. Meeting 1988

1543 Electrochemical Calendar

NOVEMBER

Review Article

R. D. ARMSTRONG — 1549 Mechanistic aspects of the K^+ ion selective electrode based on valinomycin–PVC

V. JOVANCICEVIC, P. ZELENAY and B. R. SCHARIFKER — 1553 The transport properties of oxygen in aqueous borate solutions

V. JOVANCICEVIC, B. YANG and J. O'M. BOCKRIS — 1557 Effects of chloride on the adsorption, orientation and polymerization of 1-octyne-3-ol on iron

G. CHENG and S. DONG — 1561 Chronoabsorptometric study of Prussian blue modified film electrode

J. R. VILCHE and K. JÜTTNER — 1567 Anion effects on the underpotential deposition of lead on Cu(111)

J. M. P. CARRAZON, P. C. CORONA and L. M. P. DIEZ — 1573 Electroanalytical study of sulphadiazine at solid electrodes. Determination in pharmaceutical preparations

F. GUTMANN — 1577 Entropy driven radiation

L. TUŠEK-BOŽIĆ — 1579 Conductance study of ion-pairing of alkali tetrafluoroborates and hexafluorophosphates in acetonitrile containing some substituted macrocyclic polyethers

L. J. LI, M. FLEISCHMANN and L. M. PETER — 1585 *In-situ* measurements of Pb^{2+} concentration in the lead-acid battery using mercury ultramicroelectrodes

M. MASTRAGOSTINO, A. M. MARINANGELI, A. CORRADINI and C. ARBIZZANI — 1589 Polythienothiophene as cathode active material. A comparative study with polythiophene and polydithienothiophene

J. F. REARDON — 1595 Ionic association and mobility in propylene carbonate

W. GRZYBKOWSKI and M. PILARCZYK — 1601 Electrical conductance and apparent molar volumes of $Al(ClO_4)_3$, $Be(ClO_4)_2$, and $Cu(ClO_4)_2$ in *N*,*N*-dimethylacetamide solutions at 25°C

C. YANG, R. TAKAGI, K. KAWAMURA and I. OKADA — 1607 — Internal cation mobilities in the molten binary system Li_2CO_3–K_2CO_3

T. HURLEN, H. BENTZEN and S. HORNKJØL — 1613 — Passive behaviour of niobium

R. KIRCHHEIM — 1619 — Growth kinetics of passive films

F. HAHN, D. FLONER, B. BEDEN and C. LAMY — 1631 — *In situ* investigation of the behaviour of a nickel electrode in alkaline solution by *uv-vis* and *ir* reflectance spectroscopies

C. GUANG-SEN, M. OKIDO and T. OKI — 1637 — Electrochemical studies of titanium ions (Ti^{4+}) in equimolar KCl–NaCl molten salts with 1 wt% K_2TiF_6

A. DERONZIER, D. LIMOSIN and J.-C. MOUTET — 1643 — Electrochemical oxidation of carbinols mediated by nitroxyl radicals in solution or bonded to polypyrrolic coatings on platinum and carbon electrodes

Short Communications

J. CANULLO, E. CUSTIDIANO, R. C. SALVAREZZA and A. J. ARVIA — 1649 — SEM micrography and voltammetric response of polyfaceted and electrochemically faceted single crystal rhodium electrodes

R. HAASE — 1655 — Entropy production in electrochemical systems of non-uniform pressure

H. M. VILLULLAS, G. I. LACCONI, A. S. GIODA and V. A. MACAGNO — 1657 — Enhancement of the hydrogen evolution reaction—II. Polycrystalline silver in alkaline solutions under potential holding conditions

Announcements

1661 — The International Society of Electrochemistry (ISE)

1662 — I.S.E. Meeting 1988

1663 — Electrochemical Calendar

DECEMBER

R. D. ARMSTRONG — 1669 — Editorial

R. PHILIPP, U. RETTER, J. DITTRICH, E. MÜLLER and F. KUSCHEL — 1671 — Adsorption and film formation of camphor-10-sulfonate at the mercury–solution interface

R. N. O'BRIEN and K. S. V. SANTHANAM — 1679 — Electrochemical hydrodynamics in a magnetic field with laser interferometry

P. MŁYNARSKI — 1693 — The nature of specific adsorption of some halogen ions on mercury electrode. Quantum–mechanical approach

D. A. HARRINGTON and B. E. CONWAY — 1703 — *ac* impedance of Faradaic reactions involving electrosorbed intermediates—I. Kinetic theory

L. BAI, D. A. HARRINGTON and B. E. CONWAY — 1713 — Behavior of overpotential–deposited species in Faradaic reactions—II. *ac* impedance measurements on H_2 evolution kinetics at activated and unactivated Pt cathodes

M. A. ZON, H. FERNÁNDEZ, L. SERENO and J. J. SILBER — 1733 — The application of chronoamperometry to the study of the kinetic parameters of Electron-Donor-Acceptor (EDA) complexes. The *N*,*N*,*N*′,*N*′-tetramethyl-*p*-phenylenediamine-*m*-dinitrobenzene complex in acetonitrile

S. LENHART, M. URQUIDI-MACDONALD and D. D. MACDONALD — 1739 — Photo-inhibition of passivity breakdown on nickel

S. JUANTO, J. O. ZERBINO, M. I. MIGUEZ, J. R. VILCHE and A. J. ARVIA — 1743 — Ellipsometry of polycrystalline iron electrodes in alkaline solutions containing chloride ions under different electrochemical conditions

J.-Y. ZOU and D.-T. CHIN — 1751 — Mechanism of steel corrosion in concentrated NaOH solutions

Cs. VISY and M. NOVÁK — 1757 — The electrochemical bromination of *c*-hexene on a Pt electrode in nitromethane solution

A. VÉRTES, A. WATSON, C. U. CHISHOLM, I. CZAKÓ-NAGY, E. KUZMANN and M. R. EL-SHARIF — 1761 A comparative study of Mössbauer spectroscopy and X-ray diffraction for the elucidation of the microstructure of electrodeposited Fe–Cr–Ni alloys

A. ORLIAC-LE MOING, J. DELAUNAY and J. SIMONET — 1769 On the cathodic reduction of α-substituted indan 1-ones in the presence or in the absence of oxygen. Mixed hydroxylation and coupling into stereospecific tetraols

Z. NAGY, M. MINKOFF, G. K. LEAF and R. H. LAND — 1777 Applicability of the potential step relaxation technique in the nonlinear current density–overpotential range

Short Communications

S. I. CORDOBA, M. LOPEZ TEIJELO and V. A. MACAGNO — 1783 Voltammetric behaviour of ternary mixtures of Ni, Mn and Fe hydroxides in relation to the oxygen evolution reaction

W. P. HAGAN and N. A. HAMPSON — 1787 The solubility of lithium chloride in 1.8 M lithium tetrachloroaluminate in thionyl chloride

1789 Erratum
